- Easily Replacable Ink Cartridges**
- Built In Label Designer Software**
- Durable Professional Design with Metal Parts**
- Blu Ray Version Available**

The NS2100 - Ideal for short run specialist work

The NS2100 is as rugged and dependable as the Copytrax machines you already know and rely on, and our next-generation robotics add a whole new dimension of usability!

With no software or drivers to install, the system is ready to use right out of the box. Simply load it with media, connect it to your network, and get started publishing! Burning CDs one job and DVDs the next? Don't worry about swapping out media. The media-configurable hoppers allow you to access both CDs and DVDs at the same time!

With the NS2100, you can...

- Save countless hours manually loading and unloading discs
- Burn and print discs simultaneously with the built-in printer
- Publish discs from any computer on your local network
- Master discs, create labels, and start publishing with the all-in-on TrueNet LX

TrueNet LX -

Because the NS2100 is a publishing appliance, there is no need to install and maintain numerous software packages on each computer in your network. All users access the system with the java-enabled web browsers already installed (e.g. Internet Explorer, FireFox, Safari, etc.), so it doesn't matter if they use Windows (Vista, XP, 32 bit & 64 bit), Mac OSX or Linux! There is no need to install any client software or printer drivers. Users can start, stop, modify and monitor their jobs right from within their web browser!

Concerned about security? TrueNet LX includes comprehensive security features so that you can provide your users with only the access they need. Avoid costly mistakes and prevent surprises by setting up each user with quotas and other access options.

Get in Touch -

we'll be please to hear from you. We'll be happy to discuss your requirements and explain the many systems that we have in our range.
